PROFESSIONAL SUMMARY

Junior Full Stack Web Developer with a strong foundation in C#, ASP.NET Core, SQL Server, JavaScript, Angular, Laravel, React, and Docker. A motivated Information Security graduate with hands-on experience in building web applications, problem solving, and applying clean architecture principles. Passionate about developing scalable systems, continuous learning, and delivering high-quality code. Delivered a professional session on Prompt Engineering during the Makeen Bootcamp.

EXPERIENCE

Full Stack Web Development Bootcamp https://www.ca-oman.com/ Covered end-to-end development concepts including: • Problem Solving & C# Fundamentals (Advanced) • Database Fundamentals & SQL Server • Entity Framework, LINQ & ORM Concepts • Client-Side Development: HTML, CSS, Bootstrap, JavaScript, Advanced JavaScript, jQuery • ASP.NET Core MVC & APIs (Blank Architecture, Clean Architecture) • TypeScript & Angular Development • React.js Development Fundamentals • PHP & Laravel MVC + API Development • Docker for Developers & Containerization • WordPress Theme & Plugin Handling • AI-Powered Coding Tools • Freelancing & Professional Soft Skills	10/2025 – Present Salalah, Oman
Technical Session Speaker - Makeen Bootcamp https://www.ca-oman.com/ • Presented a session on Prompt Engineering, explaining concepts, techniques, and practical applications using AI tools.	11/2025 – 11/2025
Guest Lecturer AL-SAADA SCHOOL GIRLS • Delivered a lecture on "How do I protect myself from fraud and electronic blackmail" to a class of students from grades 10 to 12.	10/2024 – 10/2024
Trainee Dhofar Municipal - IT Department • Configured network settings including NAT, subnetting, and port configurations. • Applied OSI model to practical network operations. • Managed essential protocols: DHCP, DNS. • Configured and managed IIS web server features and domain controls. • Managed user accounts and access permissions through Active Directory.	06/2024 – 08/2024

EDUCATION

Bachelor's in Information Security

09/2020 – 07/2025

University of technology and applied sciences at Salalah

SKILLS & ABILITIES

- Analytical Thinking
- Team Collaboration
- Adaptability
- Public Speaking
- Problem Solving

CERTIFICATIONS

October 2023 NASA International Space Apps Challenge

Developed a smart cooling drone designed to detect and prevent wildfires. And Integrated heat sensors to identify anomalies and trigger real-time alerts.

Git & GitHub - Almadrasa

Completed a practical course covering version control, commits, branching, merging, resolving conflicts, and Git workflows.

Database Fundamentals

covered the fundamentals of database systems including DBMS architecture, Entity Relationship Diagrams (ERD), SQL (DDL, DML, DCL), joins, sub-queries, database objects, and normalization up to 3NF.

PROJECTS

Library Management System

Full Stack WebDevelopment

Designed and developed a complete library management system for Central City Library including book cataloging, multi-branch support, member registration, staff profiles, and borrowing transactions.

Implemented Entity Framework Code First approach with SQL Server and full CRUD operations across Books, Members, Authors, Genres, and Publishers.

Technologies used: C#, ASP.NET Core MVC, EF Core, SQL Server, JavaScript, Bootstrap

Github: <https://github.com/hanadi-secureddev/LibraryWebApplication> 

HomeApplianceRepairManagementSystem

Full Stack WebDevelopment

Developed a complete management system for repair orders with customer and technician modules, automatic invoices, reporting features, and a static Bootstrap-based UI prototype.

Github: github.com/hanadi-secureddev/HomeApplianceRepairManagementSystem 

Oman Clinic Appointment System

Back-End Development

Developed a console-based application to manage clinic operations including patient registration, doctor management, appointment booking, and viewing patient-specific or all appointments. Implemented object-oriented design with classes and methods to simulate database operations using in-memory collections.

Technologies used: C#, .NET, Object-Oriented Programming (OOP), Console Application

Github: <https://github.com/hanadi-secureddev/hospital-Console-Application> 

Zay Store Web Interface

Front-End Web Development

Designed and implemented a responsive e-commerce website interface for a fashion store, featuring a multi-section layout including navigation bar, product carousel, category showcase, and featured products section. Focused on user-friendly design and interactive elements like buttons, popovers, and badges.

Technologies used: HTML5, CSS3, Bootstrap 5, JavaScript, Font Awesome.

TECHNICAL SKILLS

Backend Development Technologies & Tools

ASP.NET Core MVC & API (Blank Architecture / Clean Architecture)
Entity Framework & LINQ
SQL Server
Laravel MVC & API
Docker & Containerization
WordPress
AI-Powered Coding
ToolsGit & GitHub

Programming Languages

C#, JavaScript, TypeScript, PHP, Python

Operating Systems

Linux (Kali, Ubuntu)

LANGUAGE

Arabic

Native

English

Fluent
